

I would just like to express my thanks to your company, from the 1st point of contact, to the delivery.

1st contact with the very helpful lady in your office asking the driver if he would be able to drop over a stream. I then required the scrapings for friday which i thought could be tight on delivery from a logistics point. I was very pleased when i could have them bagged and delivered the very next day. I'm impressed, its not often that you can get such speedy, efficient service these days. The delivery driver was very helpful and explained that the ground the opposite side of the stream would be too soft for the lorry to place his hydraulic stabilizers on without them churning the ground and ultimately not being safe to unload. So he then placed the bags at the front of house very neatly and quickly and with a smile. A true asset to your company and customer service.

Many thanks from a very satisfied customer that will reccomend your services to others that may need your products.

Sandra
